PROFILE

Full-Stack Engineer with hands-on production experience building internal tools, ETL pipelines, and AI-integrated systems across web and mobile. Core stack: Laravel, React, Node.js (TypeScript), Flutter, and MySQL. Experienced in API integration, web scraping, BigQuery data workflows, and prompt engineering. Open to Full-Stack, Backend, Frontend, Data, and AI-adjacent roles.

WORK EXPERIENCE

Full-Stack Engineer

Nov 2025 – May 2026

PT Sigma Digital Nusantara | Yogyakarta

Shipped 5 internal production tools in 6 months, automating workflows across CS, Finance, BI, and Data divisions — part of Maganghub Batch 2 national internship program.

- Built an Order & Gift Management System (Laravel + Bootstrap) used across 4 divisions, digitizing a previously manual coordination process end-to-end.
- Contributed to a team-built daily ETL pipeline (Bun.js + React) syncing large-scale operational data from the company's BigQuery — personally owned the webhook integration and data transformation layer, with results visualized on a React dashboard for the Data team.
- Automated multi-courier shipment tracking (Node.js + TypeScript) via tracking.com API — capable of processing 5,000+ waybills per session in real-time, replacing a fully manual lookup process.
- Solo-built a TikTok intelligence scraper (Node.js) extracting 200+ videos and thousands of comments per video, integrated with Groq AI API for automated keyword-based sentiment classification — actively used by the BI & Data division for campaign decisions.
- Architected TikTok Business API integration flow and delivered initial data-fetch implementation as the foundation for the company's internal system integration roadmap.

Tech Stack: Laravel, Bootstrap, React, Bun.js, Node.js, TypeScript, MySQL, Groq AI API

Full-Stack Developer (Kerja Praktik)

Mar 2024 – Aug 2024

CV. Sindang Restu Group | Cipanas, Cianjur

Sole developer on a full-stack Villa Reservation System for a property & hospitality company — built end-to-end as part of university practicum (Kerja Praktik).

- Built a cross-platform mobile app (Flutter) covering end-to-end villa reservation flow — search, room selection, booking, and payment.
- Developed a web-based backend and admin panel (Laravel + MySQL) to manage reservation data, guests, and transaction reports.
- Integrated Midtrans Payment Gateway to support secure online transactions.

Tech Stack: Flutter, Laravel, MySQL, Midtrans, Figma

FEATURED PROJECTS

Community Complaint Mobile App | Flutter, Laravel, Tailwind, MySQL

- Built a cross-platform public complaint reporting app (Flutter + Laravel) with digital submission, real-time status tracking, and push notifications — designed for local government use.

Hospitality & F&B Reservation Platform | Flutter, Laravel, Tailwind, REST API, Midtrans, MySQL

- Built a general-purpose hospitality platform where guests can reserve rooms and order F&B in a single Flutter mobile app — backed by a Laravel REST API and a role-based web panel (Laravel + Tailwind) for staff, with Midtrans payment integration. Architected to be deployable across multiple properties.

Financial Management System | Laravel, MySQL

- Laravel-based financial tracking system with categorized expense/income recording, stock management, and exportable operational financial reports.

Student Savings & Inventory Management System | Laravel, MySQL

- Web-based system for managing student savings transactions and inventory stock, with daily transaction logging and report generation — built as a freelance project for a school.

EDUCATION

Bachelor of Informatics Engineering (GPA: 3.70 / 4.00)

Sep 2021 – Aug 2025

Universitas Suryakancana | Cianjur

Presenter & Paper Author at the National Seminar on Engineering (SEMNASTEK) UNSUR 2025: "Leveraging Artificial Intelligence Technology to Enhance Regional Innovation Index"

Vocational High School Degree in Software Engineering

Jul 2018 – Jun 2021

SMK Negeri 1 Cianjur | Cianjur

SKILLS

Languages:	PHP, Dart, TypeScript, JavaScript
Frontend:	React.js, Bootstrap, Figma
Backend:	Laravel, Node.js, Bun.js, REST API
Mobile:	Flutter
Database:	MySQL, BigQuery
Tools:	Git, GitHub, Postman
Data & AI:	Web Scraping, ETL Pipeline, Groq AI API, Prompt Engineering
Integrations:	Midtrans Payment Gateway, TikTok Business API

CERTIFICATIONS & TRAINING

- Cloud & Generative AI on AWS — AWS AI Academy (2026)
- Spec-Driven Development with Kiro — AWS AI Academy (2026)
- AI Ethics — Pijak × IBM SkillsBuild (2026)
- Introduction to Generative AI — Pijak × IBM SkillsBuild (2026)
- Introduction to Artificial Intelligence — Pijak × IBM SkillsBuild (2026)
- Project Management Fundamentals — Dicoding Indonesia (2025)
- SOLID Programming Principles — Dicoding Indonesia (2025)
